# “ YOUR PASSPORT TO U.S. RESIDENCY SUCCESS STARTS HERE! “

- **Guided by Experts:** Mention Dr. Indranil Basu, a recognized name in the medical field, offering free personalized counseling to guide students through the residency process. This builds trust and shows they'll have access to top-tier mentorship.
- **Comprehensive Residency Preparation:** From research training to publication, our program is designed to make you stand out in your U.S. residency application.
- **Guaranteed Publication Opportunities:** All students receive support in getting their work published in reputable journals, a key asset in residency applications.
- **Personalized Research Training:** Tailored to your medical interests and career goals, ensuring that you produce meaningful and high-quality work.

## WHY CHOOSE US?

- **One-on-One Mentorship:** Unlike other programs, we provide personalized mentoring and support, so you're never alone on your residency journey.
- **Guaranteed Publication Support:** Your research will be guided towards publishable results in high-impact journals.
- **Tailored to International Graduates:** Our program understands the unique challenges faced by international medical graduates and addresses these to improve your residency chances.

## Boost Benefits of Enrolling into the Program

### 1. Free Counseling with Academy team:

- Clearly state that students will have access to one-on-one counseling sessions with Dr. Basu, who will personally mentor them on every step of the residency application process, including interviews, research strategies, and publication guidance.

### 2. Access to a Global Network:

- Highlight that students will join an exclusive community of medical graduates, providing networking opportunities that can open doors to clinical observerships and collaborations.

### 3. Support Beyond Research:

- Mention that students receive guidance on creating winning ERAS applications, optimizing their CVs, and preparing for residency interviews.

### 4. Flexible Learning Options:

- Offer remote access to the research training program, allowing students from anywhere in the world to participate without physical presence.

### 5. Exclusive Masterclasses:

- Introduce masterclasses on topics like residency interview preparation, U.S. medical licensing exams, and navigating the U.S. healthcare system, all included in the program.

### 6. Long-Term Support:

- Mention that even after completing the course, students will have access to alumni resources and continued guidance on future medical career opportunities.
