

TELE-ROTATION PROGRAM

Build Clinical Skills.
Strengthen Your Residency Application.

100% VIRTUAL

Train From the Comfort of Your Home

Every part of the Tele-Rotation Program happens online. Clinical teaching, live virtual patient encounters, guided lessons, and one-on-one feedback are all delivered remotely, so you build real, U.S.-standard clinical skills without leaving home — no travel, no visas, no relocation. All you need is a laptop, an internet connection, and four weeks.

- Live virtual patient interactions & clinical teaching, start to finish
- Structured weekly lessons and reading delivered entirely online
- One-on-one faculty feedback — all sessions held remotely
- Flexible scheduling that fits around your existing commitments

Who Should Join?

- International Medical Graduates (IMGs)
- Medical Students
- USMLE Aspirants
- Candidates preparing for U.S. Residency

Your 4-Week Learning Journey

A structured progression from clinical fundamentals to direct patient care.

History & Exam

Mortality
Conference

Journal Club

Clinic Patient

1

WEEK 1

History Taking, Clinical Examination & Clinical Case Discussion

Builds the clinical foundation: structured patient history-taking, hands-on examination technique, and guided discussion of clinical cases with faculty feedback.

- Patient-centered communication (U.S. standards)
- Structured history-taking (HPI, PMH, FH, SH, ROS)
- Physical examination technique
- Clinical case discussion with faculty feedback

2

WEEK 2

Mortality Conference

Moves from the bedside to the care team's review process: a structured Mortality Conference examining case outcomes and the clinical reasoning behind them.

- Case outcome review
- Faculty-guided discussion of clinical decision-making

3

WEEK 3

Journal Club & Research Skills

Shifts to evidence-based practice: critical appraisal of the medical literature and a structured journal club presentation.

- Critical appraisal of research papers
- Evidence-based medicine approach
- Presentation techniques
- Peer discussion & feedback

4

WEEK 4

Seeing / Assessing a Clinic Patient

Brings it all together: apply your history-taking, examination, and clinical reasoning skills to directly assess a clinic patient.

- Direct clinic patient assessment
- Applied history-taking & examination skills
- Real-time faculty feedback

Program Duration & Fee

One structured, fully virtual progression — four weeks, start to finish.

Program Duration

4 weeks, fully virtual
Week-by-week guided progression
Practical exposure + feedback

Program Fee

\$650

Why Choose This Program?

- Structured, step-by-step residency preparation
- Focus on U.S. clinical standards
- Hands-on learning with virtual patients, from home
- Enhances your CV & residency profile
- Designed specifically for IMGs

The program is built to help candidates develop real clinical skills and confidence required for U.S. residency applications.
